Letter of Appreciation from the Ambassador of France for our contribution in supplying the fully automated PCR testing system

The recent expansion of COVID-19, a new coronavirus infection, has posed a major impact on global economic activities and the situation is still unpredictable. Precision Systems Science Co., Ltd. (PSS) contributes to the solution of global problems caused by COVID-19 pandemic through rapid testing using PSS's fully automated PCR testing system (geneLEAD series).

In this situation, a fully automated PCR analysis system that PSS supplies as OEM to France-based company ELITech is used in the medical field battling the COVID-19 crisis in France. In response to the social contribution made by PSS and its partner ELITech by supplying the equipment and consumables (prefilled cartridges, extraction reagents and plastic consumables), PSS and President/CEO Tajima recently received a letter of appreciation from H.E. Mr. Laurent Pic, Ambassador of France to Japan.

President/CEO Tajima commented "Every country in the world is fighting COVID-19. We have received a letter of appreciation from H.E. Mr. Laurant Pic acknowledging that the fully-automated PCR system and reagent kits co-developed by PSS and ELITech are making a big contribution in the detection of COVID-19 virus in France. We are very honored and pleased to receive such an acknowledgment for our contribution. We will continue to commit our efforts to provide quality products and solutions to our customers. We pray for the end of the COVID-19 crisis."
